## Acròpolis. Instruccions de muntatge

Per muntar aquest desplegable de tres quadrants necessiteu imprimir les tres plantilles d'arquitectura original (2 de plec horitzontal per als quadrants anteriors i una de plec vertical per al quadrant posterior) i la peça central de suport, en cartolina no gaire gruixuda (entre 130 i 180 g).

Primer retalleu i plegueu les plantilles. És aconsellable fer-ho amb el full sencer, abans de retallar el perfil. Retalleu i plegueu també el suport central.

A continuació, retalleu el perfil dels dos quadrants anteriors i enganxeu-los a les parets del suport doblegant les pestanyes cap enrere. Enganxeu-les també a la base. Després, enganxeu-los entre ells, a la cantonada on es troben, utilitzant les pestanyes verticals.

Per muntar el quadrant vertical posterior, enganxeu primer el temple central i després totes les pestanyes. Finalment, comproveu que es plega tot correctament abans d'enganxar-ho a la base.
